Motivated and enthusiastic Software developer. I thrive on embracing new technologies and have gained valuable internship experience. My journey in development started during my academic pursuits and was further nurtured through internships, where I honed my skills in areas like database management and API development.

## WORK EXPERIENCE

### Backend Developer

Saaspect

Aug 2022 - present

- Collaborated with cross-functional teams to develop and maintain back-end systems for a range of real-world projects
- Revamped and optimized database schemas, enhancing data storage and retrieval efficiency, leading to improved system performance and reduced operational costs.
- Played a pivotal role in Agile development by actively contributing to sprint planning, daily stand-ups, and iterative development cycles, facilitating a reduction in project completion time while maintaining high-quality code standards.
- Consistently delivered project milestones on time, achieving a 100% on-time delivery rate and ensuring project continuity
- Received consistently positive feedback on system performance and responsiveness, contributing to client satisfaction during the internship.

### Full stack Developer

OkayG Softwares

Oct 2021 - Jan 2022

- Designed and implemented a scalable architecture that allowed the startup to handle a increase in user traffic, ensuring a smooth user experience even during peak usage.
- Led the end-to-end development of web applications, taking charge of both front-end and back-end, resulting in the successful launch of web applications.
- Mentored junior developers, fostering a culture of continuous learning and improvement, resulting in a more knowledgeable and skilled development team

## PROJECTS

### Hyperlocal Delivery system

- Developed a Node.js and Express.js backend for a hyper-local delivery system, using MongoDB for efficient order management and real-time tracking.
- Enhanced system performance with real-time tracking, geospatial queries, and efficient indexing for a highly scalable and responsive delivery platform.

### Restaurant backend API

- Developed a Node.js and Express.js backend for a restaurant app, using MongoDB to practice my backend skills.
- Learnt new skills and enhanced my backend skills by designing and developing complex system for the app.

### Social Media App

- Crafted the frontend of a social media app using React.js, creating engaging user interfaces, implementing state management, and optimizing performance.
- Prioritized user experience by designing responsive and intuitive interfaces, incorporating interactive features, and ensuring cross-browser compatibility for a seamless social media platform.

## SKILLS

**Languages:** C++, C, Javascript

**Technical:** MERN, Node, MongoDB, Express, React, Web Development, RDBMS, DBMS, Git, Database Designing, Github, Code Review, Documentation, Redis

**Concepts:** Object Oriented Programming, Functional Programming, Agile/Scrum, MVC, REST API

## EDUCATION

**Indian Institute Of Information Technology, Sonapat - Bachelors**

2020-2024(expected)  
Computer Science Engineering  
CGPA : 8.9

**The Genius School - 12th**

2019-2020  
Rania, Haryana  
Non-Medical  
Score : 96.2%
